Case Definition

Confirmed Case

Laboratory confirmation of infection:

- Identification of rotavirus in stool^(A) by electron microscopy, enzyme immunoassay (EIA), latex agglutination or molecular methods when available

Probable Case (Outbreak Only)

Clinical illness^(B) in a person who is epidemiologically linked to a confirmed case

^(A) Refer to the [Public Health Laboratory \(ProvLab\) Guide to Services](#) for current specimen collection and submission information.

^(B) Clinical illness is characterized by fever, emesis, watery diarrhea and sometimes associated with dehydration, especially in young children.

Reporting Requirements

Laboratories

All laboratories shall report all positive laboratory results by mail, fax or electronic transfer within 48 hours (two business days) to the:

- Chief Medical Officer of Health (or designate), and
- Medical Officer of Health (or designate) of the zone.

Alberta Health Services and First Nations and Inuit Health Branch

- Laboratory surveillance only except in the event of an outbreak. Completion of a Notifiable Disease Report is not required.
- Report outbreaks only using the [Alberta Outbreak Report Form](#).

Appendix 1: Revision History

Revision Date	Document Section	Description of Revision
November 2021	General	• Updated Template • Added web link to Alberta Outbreak Report Form
	Case Definition	• Removed clinical illness from Confirmed Case as under laboratory surveillance only. • Added "Outbreak Only" to Probable Case as only reportable in an outbreak.
