

Communicable diseases reportable by NDR or other form

Reference list for MOHs and designates

Diseases in red are reportable by fastest means possible (FMP) from MOH to CMOH

Acute Flaccid Paralysis	Legionellosis
Acute Hepatitis of Unknown Etiology in Children	Leprosy
Amoebiasis	Listeriosis
Anthrax	Lyme Disease
Arboviral Infections – including:	Lymphogranuloma Venereum
Chikungunya Virus	Malaria
Dengue Fever	Measles
Eastern Equine Encephalitis	Meningococcal Disease, Invasive
Flavivirus (Other)	MPOX
Jamestown Canyon Virus	Muco-Purulent Cervicitis
Japanese Encephalitis	Multisystem Inflammatory Syndrome in Children and Adolescents
Powassan Encephalitis	Mumps
Snowshoe Hare Virus	Non-Gonococcal Urethritis
St. Louis Encephalitis	Paratyphoid Fever
West Nile Virus	Pertussis
Western Equine Encephalitis	Plague
Yellow Fever	Pneumococcal Disease, Invasive
Zika Virus	Poliomyelitis
Botulism	Psittacosis
Brucellosis	Q Fever
Campylobacteriosis	Rabies
Carbapenemase Producing Organisms	Rare or Emerging Communicable Disease
Chancroid	Respiratory Syncytial Virus
Chlamydia (includes perinatally acquired)	Rickettsial Infection
Cholera (O1, O139)	Rubella (includes Congenital Infection / Syndrome)
Coronavirus, COVID-19	Salmonellosis
Coronavirus, MERS/SARS	Severe Acute Respiratory Infection
Coronavirus, Novel	Shellfish Poisoning
Creutzfeldt-Jakob disease, Classic & Variant	Shigellosis
Cryptosporidiosis	Smallpox
Cyclosporiasis	Streptococcal Disease - Group A, Invasive
Cytomegalovirus, Congenital	Syphilis (includes Congenital)
Diphtheria	Subacute Sclerosing Panencephalitis
Disease in Unusual Form	Tetanus
Enterovirus D68	Trichinosis
<i>Escherichia coli</i> (Verotoxigenic)	Toxoplasmosis, Congenital
Giardiasis	Tuberculosis
Gonorrhea (includes perinatally acquired)	Tularemia
Haemolytic Uremic Syndrome	Typhoid Fever
<i>Haemophilus influenzae</i> - non-serotype b, Invasive	Varicella (Chickenpox), Hospitalized or Congenital/Neonatal
<i>Haemophilus influenzae</i> - serotype b, Invasive	<i>Vibrio cholerae</i> (non-O1, non-O139)
Hantavirus	<i>Vibrio parahaemolyticus</i>
Herpes Simplex, Neonatal	Viral Haemorrhagic Fevers
Hepatitis, Acute/Severe of Unknown Origin in Children	Argentine Haemorrhagic Fever
Hepatitis A	Crimean Congo Haemorrhagic Fever
Hepatitis B, Acute & Chronic	Ebola Haemorrhagic Fever
Hepatitis C, Acute & Chronic	Lassa Fever
Hepatitis E	Marburg Haemorrhagic Fever
Histoplasmosis	Rift Valley Viral Haemorrhagic Fever
Human Immunodeficiency Virus	Yersiniosis
Influenza, Avian; Influenza, Novel	
Influenza, Seasonal
