solar@stampedeelectric.ca

This proposal is valid for 30 days from Aug 20, 2025. Pricing and availability subject to change.

Your Solar Design

System Ratings

9.000 DC kW (STC)

Estimated Year One Production

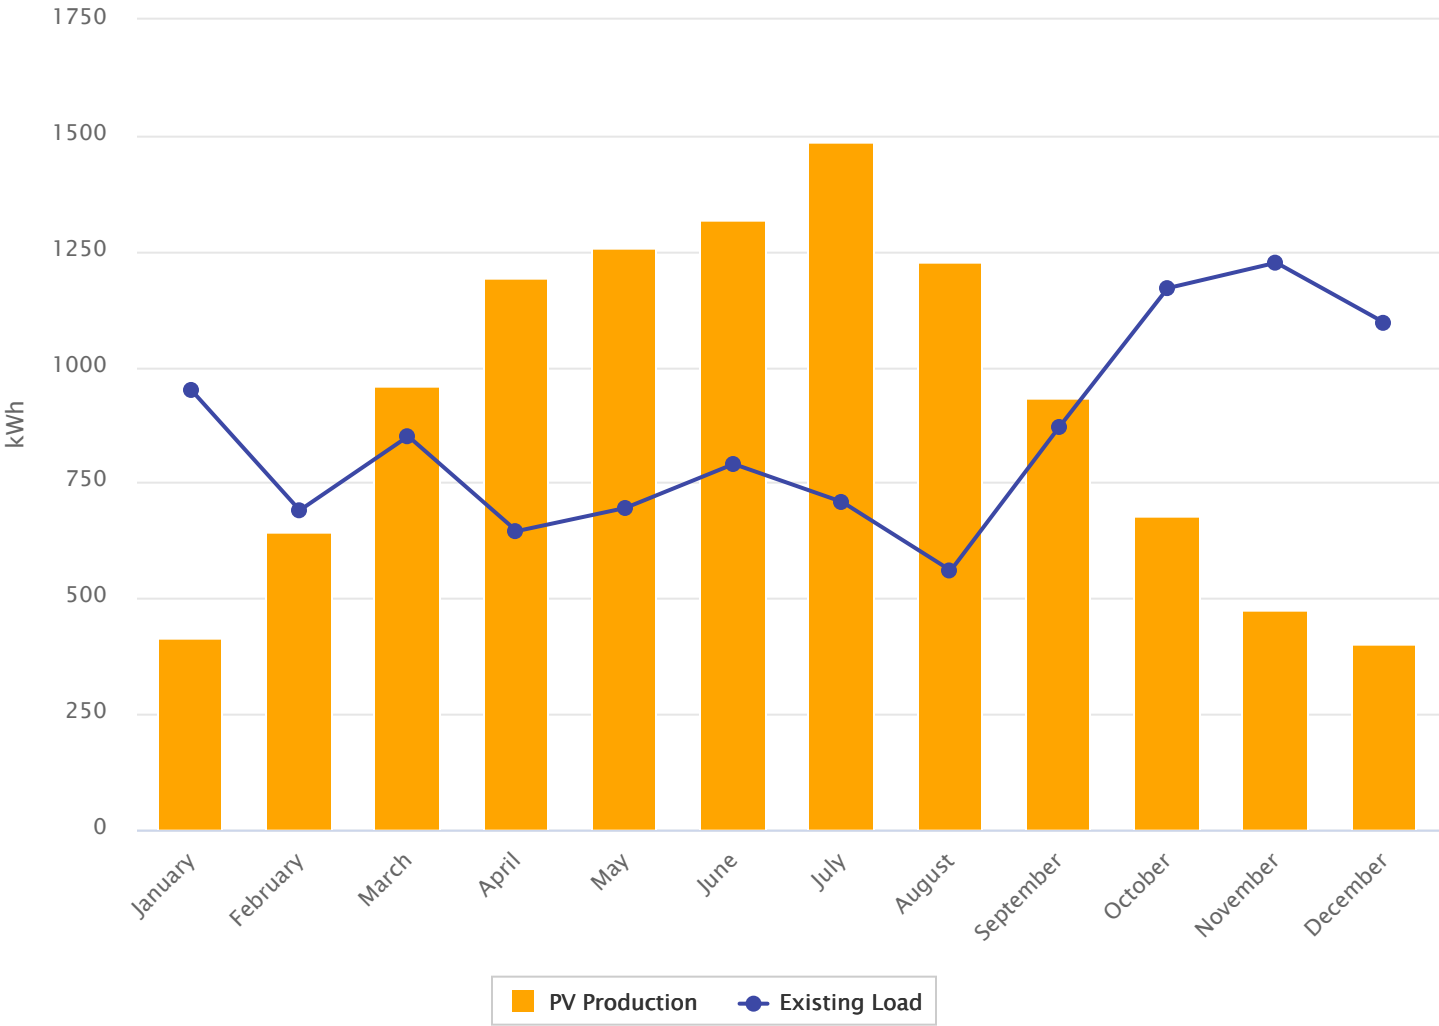

11,391 kWh

PV Components

- **Modules:** (18) LONGi Solar LR8-54HGBB-500M
- **Inverter(s):** (9) Altenergy Power Systems DS3 [240V]

Your Electricity Use and Solar Production

Monthly Production

Your electricity use is estimated based on historic usage information supplied to Stampede Solar Energy modeled load profiles for a Residential building in your area.

Additional Work

Breaker installation

Stampede will connect circuit feeders to breakers and install the breakers in the designated panel.

Critter Guard

Stampede will supply and install a protective guard around the perimeter of the solar array to prevent birds and rodents from accessing the areas under the panels.

PV Monitoring

Stampede will set up the app, create customer accounts, and demonstrate to the customer how to use the app.

Subpanel Upgrade

Stampede will up-grade the existing 8/16 Subpanel to a larger panel, to allow for the additional solar circuits required.

System Cost

GST Not Included.

PV System	\$22,050.00
Breaker installation	\$0.00
Critter Guard	\$0.00
PV Monitoring	\$0.00
Contract Price	\$22,050.00

Net System Cost	\$22,050.00

Summary

Existing Utility & Energy Use

Estimated Annual Consumption	10,248 kWh
Projected Electric Cost in Coming Year	\$2,429
Assumed Annual Electric Cost Inflation	5.7 %
Current Rate Plan	Residential (D100)
Post Solar Rate Plan	Residential (D100)
Utility Company	Enmax - Canada

System

PV System Rating (STC)	9.000 DC kW (STC)
Year 1 Solar Production	11,391 kWh
Annual Degradation	0.50 %
25 yrs System Production	258,899 kWh

Costs

Price	\$22,050.00
Estimated Post Solar Annual Utility Bill	\$875

By Joining the Stampede Solar Club, based on your current usage and rate plan with your energy supplier, we can save you an **estimated additional \$600/year**. Further reducing your electrical bill. Ask us to explain the details.

Buy Selling you OffSet Carbon Credits, we can also save you an **additional \$300 per year**.

Stampede Solar does not provide tax or legal advice. You should consult your tax advisor for more information. The data provided in this proposal is a preliminary estimate and does not represent a binding agreement or obligation. No party provides and guarantees, warranties, or representations regarding the production, utility rate increases, or any other data in this sales proposal.

Additional Items Included in Proposal

-All of Stampede's installations include intelligent Solar System Monitoring. Allowing our customers to monitor the system, view history of production and see the output of every module individually.

-Warranties, The Tier 1 Panels we use have a 25 year warranty on degradation. The Inverters have 25 year warranty. The racking and wiring is covered under our warranty, of 25 years.

-Stampede Solar handles all drawings, applications and permits required for the install. Including the drawings and the Net Billing Applications with your utility, on behalf of the customer.
