Contract with Selected Vendor (6 weeks +)

Why are we going to RFP?

How will we know this RFP was
successful?

RFP Scoring - What's Mandatory?

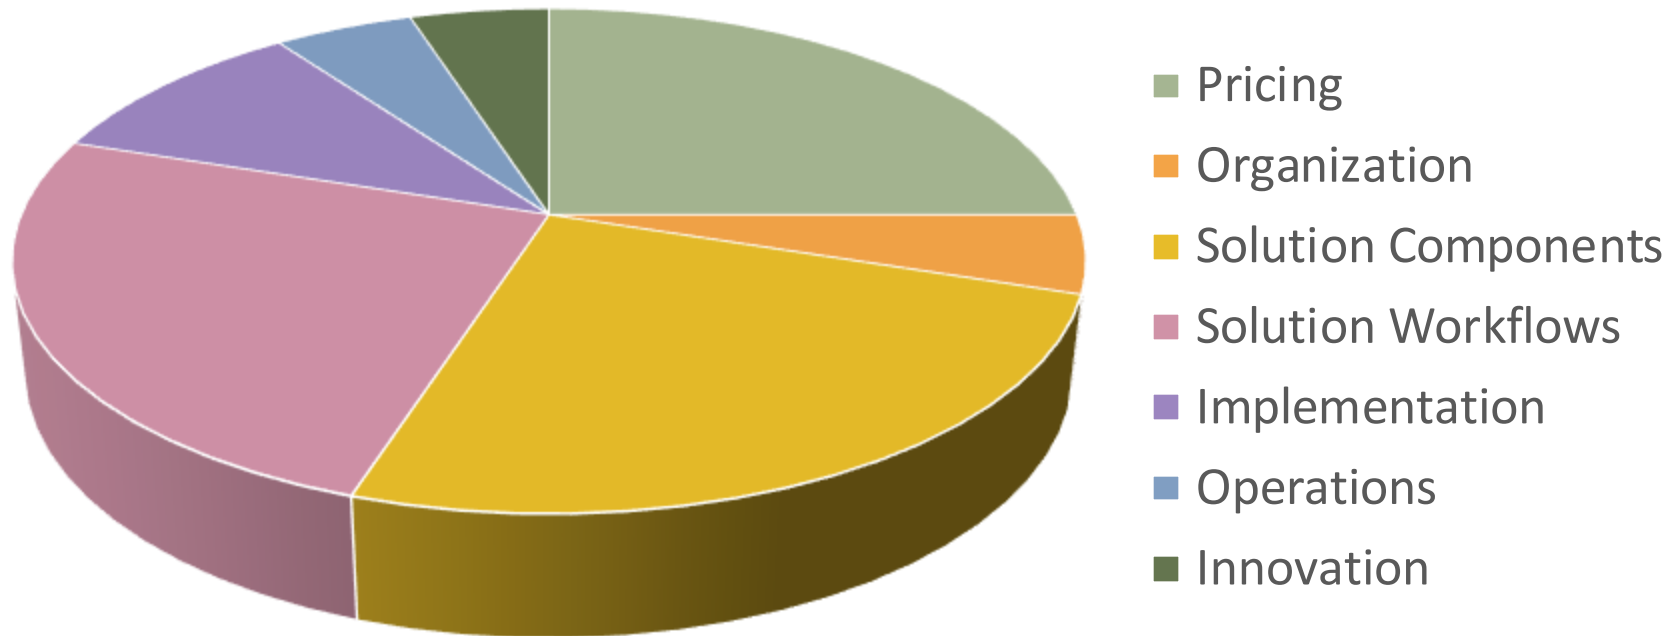

What (if any) show-stoppers do we have for vendors?

If they do not meet the vendor's response to be scored!

RFP Scoring – There's only 100%

RFP Scoring – Creating a specific rubric

Section	0	1	3	5	Weight
Approach	Did not answer question	Generic standard PM Approach	Generic Product-based approach	Customized Approach	2
Team	Did not answer question	Roles, but no resumes	Qualified candidates for roles	Qualified local candidates for roles	5
Time Line	Did not answer question	No timing estimates	Timing with a duration range	Timing with appropriate assumptions	3

RFP Scoring – Creating a general rubric

Solution Component

Rubric

Authentication

- Minimum Specifications
 - Uses AHS Active Directory
 - Specification 2
- Desirable Specifications
 - Specification 1
 - Specification 2

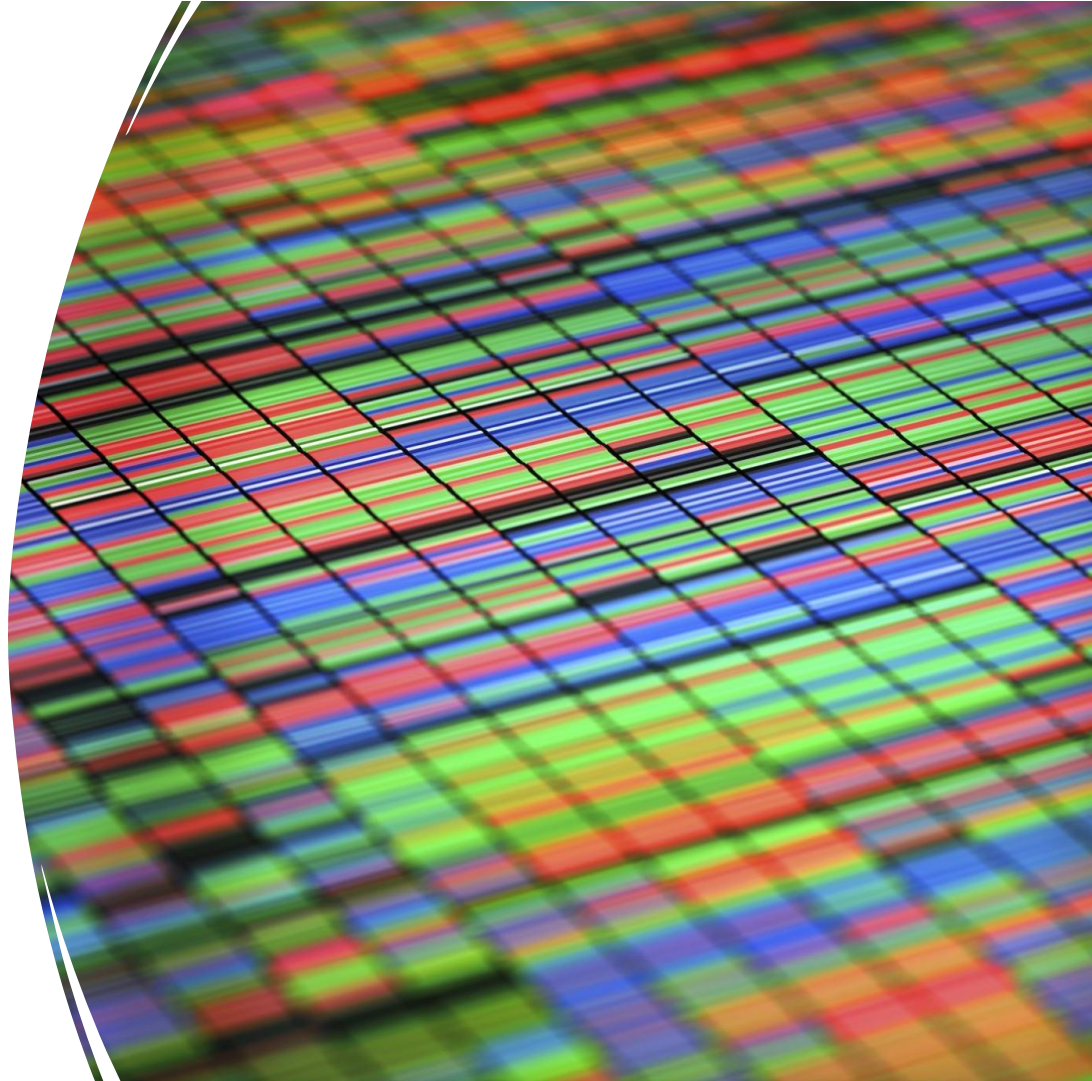

0	Does not answer the question
1	Does not meet minimum specifications
3	Meets minimum specifications
5	Meets minimum specifications & desirable ones

Score vs. Weight – Solution Component

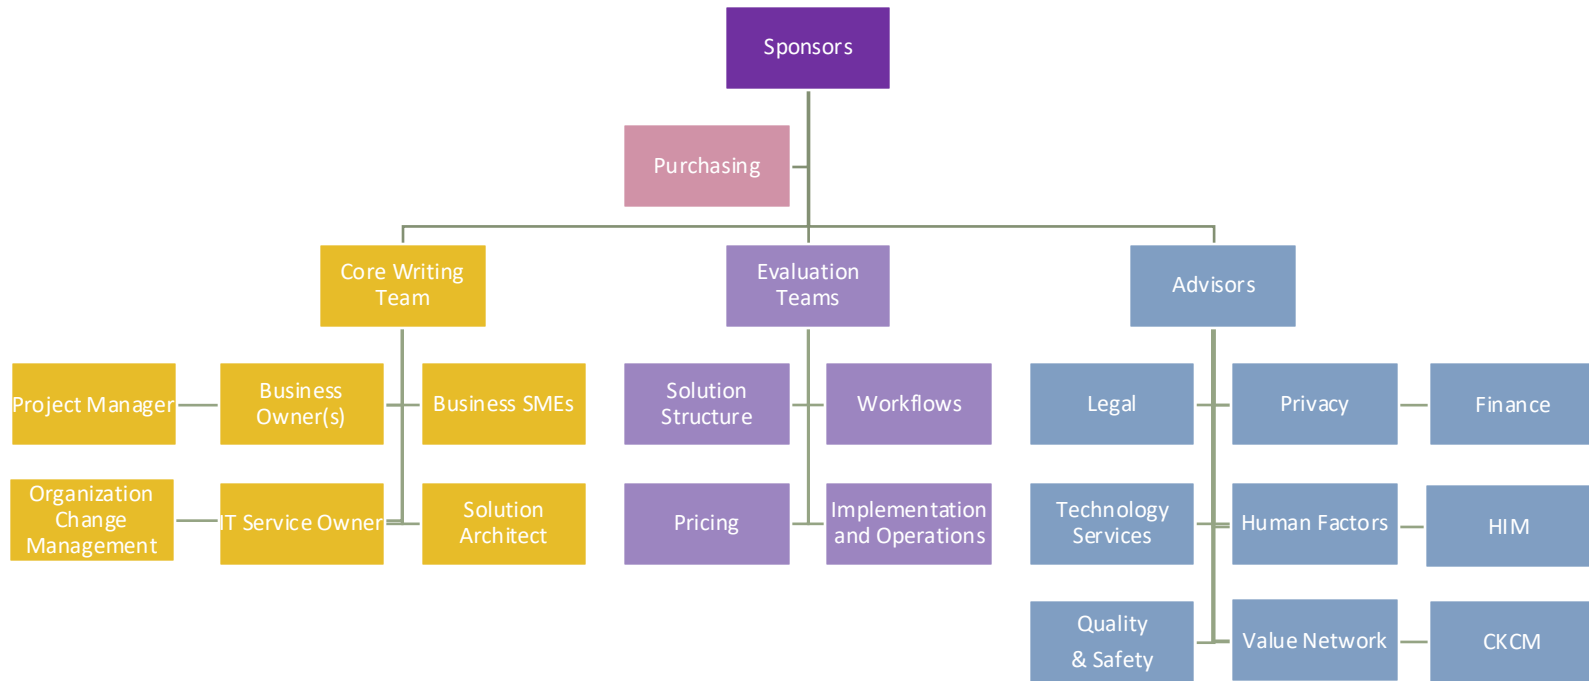

Solution Component	Points allocated	Score	Weighted Score
Component 1	5	0-5	
Component 2	2	0-5	
Component 3	3	0-5	
Component 4	2	0-5	
Component 5	10	0-5	
Component 6	2	0-6	
Component 7	1	0-5	
Total Available	25		

Business Application RFP Table of Contents

1. Background
2. RFP Goals and Objectives
3. Solution Context/Structure
4. Solution Workflows
5. Solution Implementation
6. Solution Operations
7. Innovation

RFP Schedule A Logistics – Team Structure

RFP Advisors

- We need to have many, many people review and approve the content we are using to go to the marketplace.
- Each member of the core team takes responsibility for one of these stakeholders – spread the load!
- Sponsors will need to be engaged to remove barriers and ensure timely support
- Make them aware early and engage after we have a minimum viable product.

Approach for RFP Schedule A

1. Create Candidate Section Scoring
2. Elaborate each section scoring rubric and weighting
3. Assign lead authors to the appropriate section(s)
4. Deliver awareness sessions for Evaluators and Advisors
5. Create minimum viable product as quickly as possible (4-6 weeks) and review with the Sponsors
6. Engage advisors only after MVP
7. Each week after that, have a product that could be released if we had to.
8. Decide when the product is 'good enough'

Empowering others to be more successful

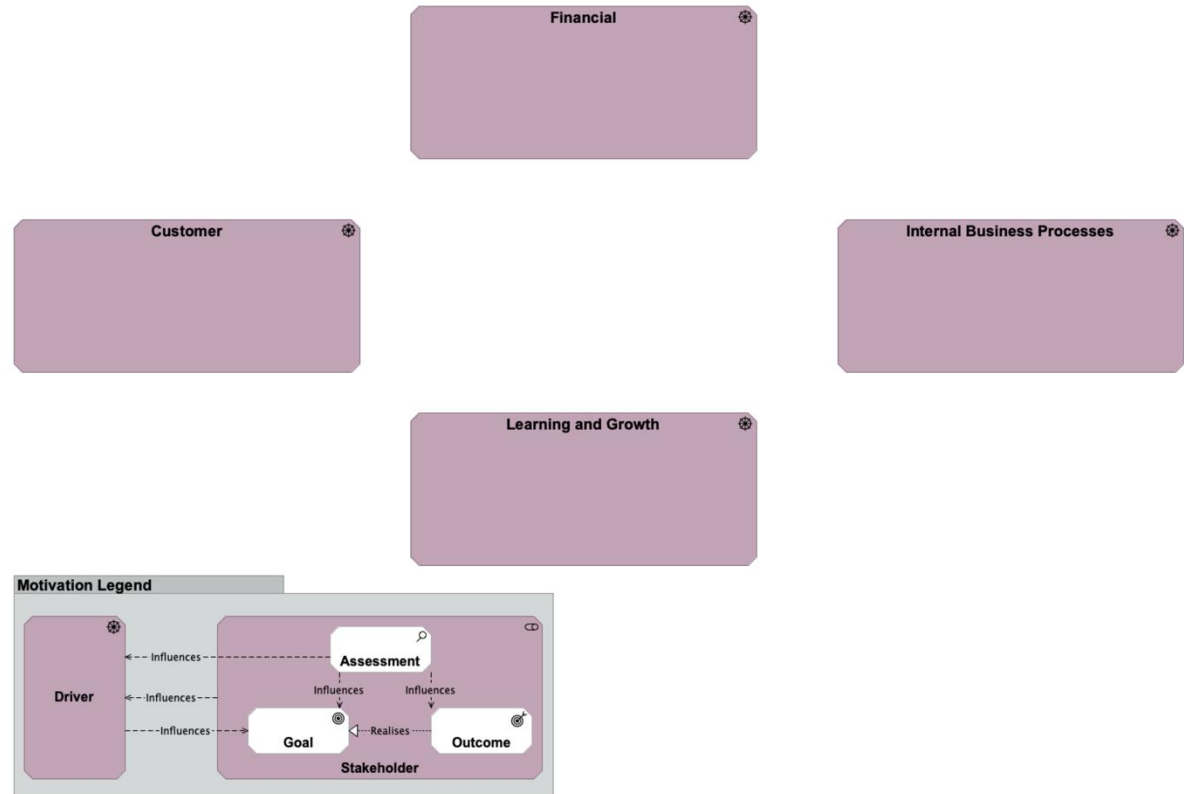

Request for Proposal Candidate Models

Visualizations that may assist in supporting the narratives

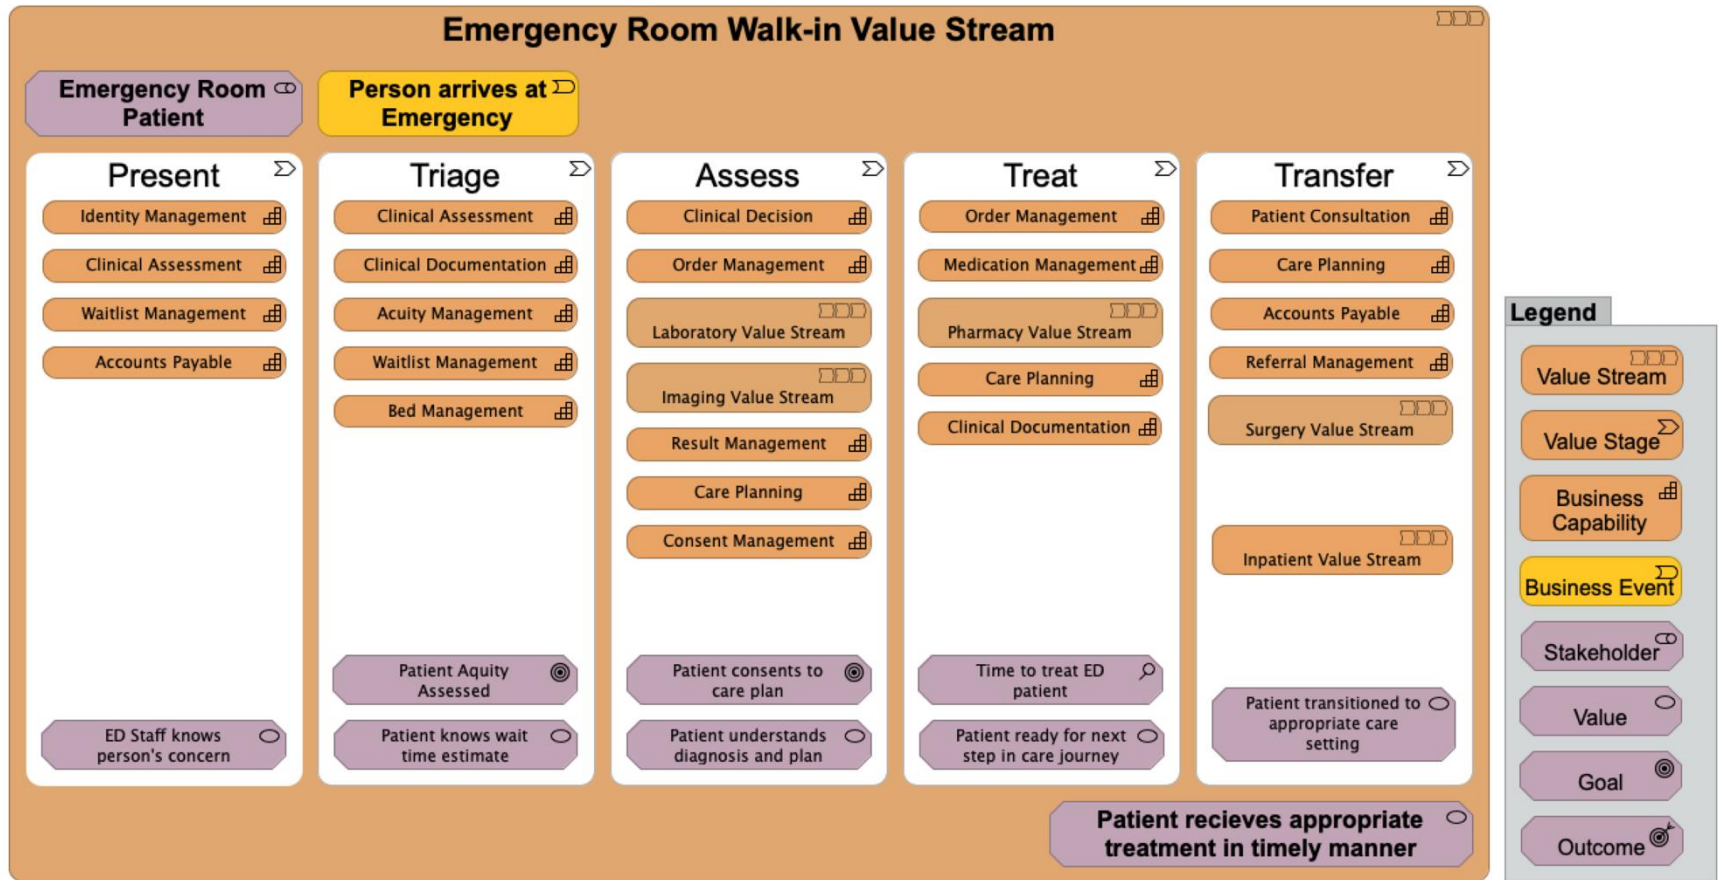

Balanced Scorecard

- Where possible add publicly available goals or objectives
- Geographic models showing locations, coverage areas, etc. are also valuable

(Stakeholder) Balanced Scorecard Template

Value Stream Networks

RFP Scoring – Creating a general rubric

Technology Environments Model

Guidance for using this template

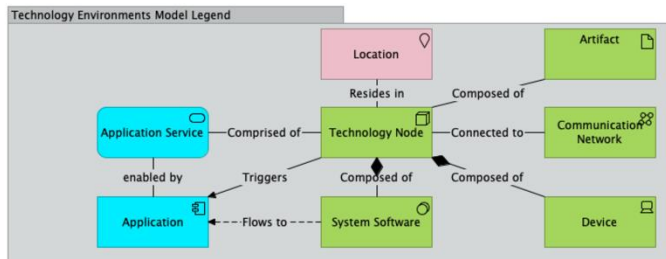

- 1) Create your new blank view with the suffix - "Technology Environments" so that others can find models using serach.
- 2) Highlight all of the elements on this template and copy and then move to your new view and paste special.
- 3) Change the title to reflect the technology environments you are creating
- 3) Delete this note
- 4) Start adding components from the model inventory list and only add new components if you can't find them in the component inventory
- 5) You may need to update the legend to reflect any additional

Note - You can use the WIndow > Hints view to see descriptions of object types.

A few examples of views have been provided as guidance. That group should be renamed related views and all related views added for reference.

Some notes on the legend

- a) Application Service = what Application Service means in the ServiceNow CMDB which is a technology Environment
- b) Application Component = Where possible, use the (G)lobal applications which are sourced from the Master Architecture Data (MAD) application list which includes the CMDB listed applications.
- c) Technology Node - Largely a technology configuration item in the CMDB. If applicable include the server name. Decompose into System Software, Artifacts, Networks and specific devices as required.

Workflow

- **Trigger** – What causes this workflow to execute?
- **Step 1** – Role-based activity
- **Step 2** – Role-based activity
- **Step 3** - Role-based activity
- **Outcome** – What is the measure of success for this workflow?

Rubric

0	Does not answer the question
1	Does not meet the outcome of the workflow
3	Meets the outcome of the workflow
5	Meets outcome and exceeds usability criteria

Business Process

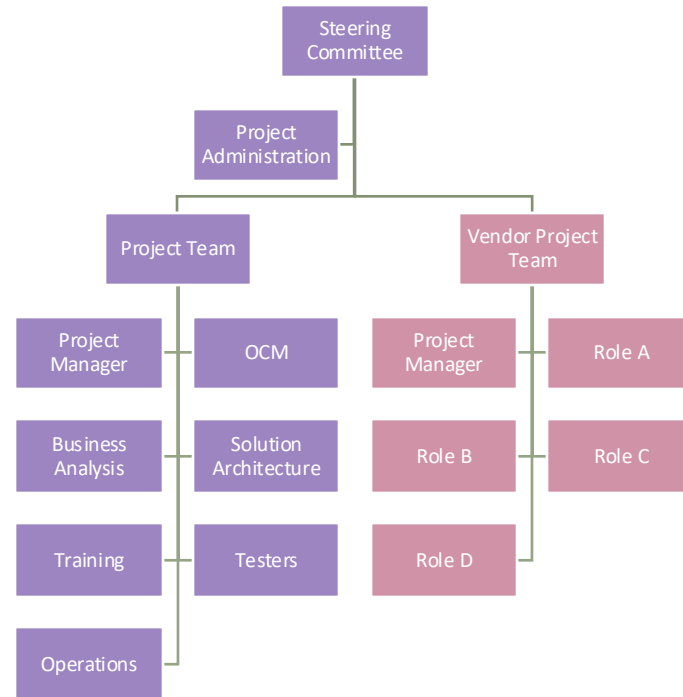

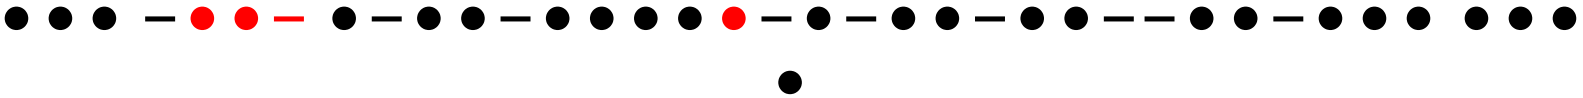

Implementation Scoring Rubric

Section	0	1	3	5	Weight
Approach	Did not answer question	Generic standard PM Approach	Generic Product-based approach	Customized AHS Approach	2
Team	Did not answer question	Roles, but no resumes	Qualified candidates for roles	Qualified Canadian candidates for roles	4
Time Line	Did not answer question	No timing estimates	Timing with a duration range	Timing with appropriate assumptions	2
Milestones	Did not answer question	No clear milestones	Clear milestones, not specific	Specific & Measurable milestones	2

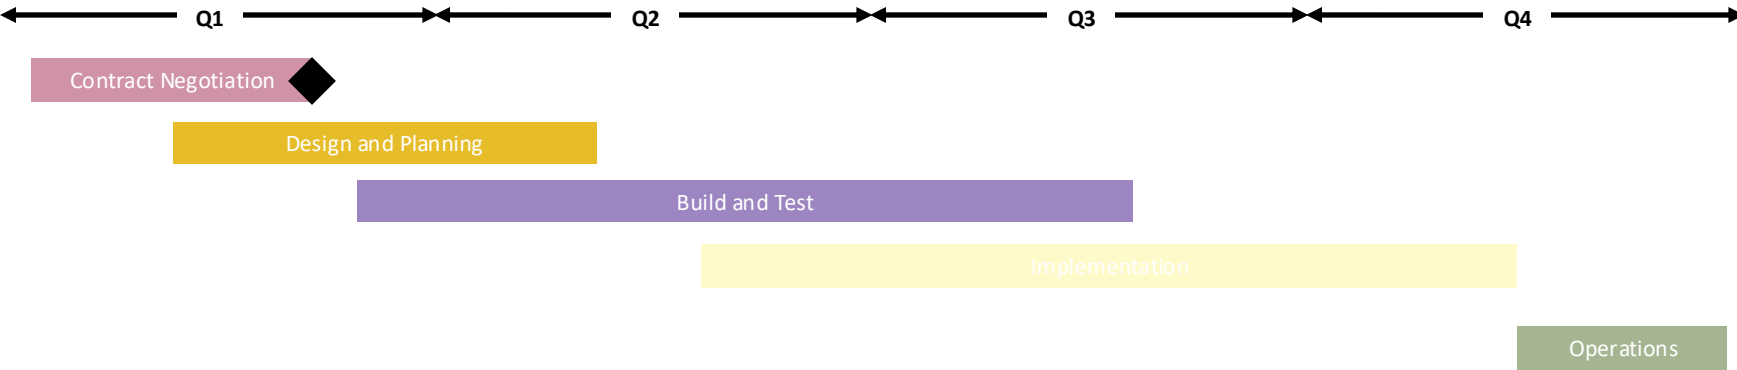

Project Organization Structure

- Note – this is more to highlight key members of the vendor team

Sample Implementation Timeline

Operations Scoring Rubric

Section	0	1	3	5	Weight
Release Management	Did not answer question	Generic Release narrative	Generic Product-based approach	Customized AHS Approach	2
Incident Management	Did not answer question	Basic Incident Management	Established Incident management	Qualified Canadian candidates for roles	4
Change Management	Did not answer question	No timing estimates	Timing with a duration range	Timing with appropriate assumptions	2
Problem Management	Did not answer question	No clear milestones	Clear milestones, not specific	Specific & Measurable milestones	2
